EXPERIENCE

Software Engineering Intern | *UCLA CCLE*
April 2020 - Present

Develop full-stack LTI tools to integrate into Moodle/Canvas using a **Node, React, Express, and MongoDB** framework.

- ❖ Build a user-friendly frontend with React hooks and Instructure UI.
- ❖ Write RESTful APIs to send/retrieve user and course data between the client and MongoDB.
- ❖ Write **Jest/Enzyme** unit tests for airtight functionality.

Contribute frontend and backend features for UCLA's CCLE Moodle server. (**PHP, Javascript**)

Use **Git** and **Jira** for collaboration and code review, **Docker** for local environment.

Dev Team | *ACM Teach LA*
Sept. 2019 - Present

Develop web education tools for students at local Title I schools.

Create interactive single-page modules for ACM AI's machine learning course.

- ❖ Incorporate **Javascript** libraries such as FunctionPlot (d3.js), math.js, and anime.js.
- ❖ Beautify frontend with Bulma CSS framework.

Contribute to the frontend of our online code editor (**React**): *editor.uclaacm.com*

PROJECTS

Interactive Shell   *C*

Wrote a script in **C** to send client's keyboard commands to a server and return the output from a specified shell program (i.e. Bash).

Experimented with polled I/O, forking, data compression, and inter-process communication.

Record Player Simulator   *JS, WebGL*

Designed an in-browser 3-D interactive record player / shooting game with **Javascript**.

Implemented animations, collision logic, gravity, and more with a **WebGL** framework.

Personal Portfolio   *React, Node*

Created a **React** app to showcase projects and involvements: *kilometerskang.github.io/me*

Styled using **SASS**.
